DWI Addiction Treatment Program

Strategy Purpose and Description

The DWI Addictions Treatment Program provides social alcohol detoxification and treatment services to inmates, accomplishing safe withdrawal from alcohol abuse or dependency, for up to 28 days. The DWI Addiction Treatment Program provides these services through Substance Abuse Counseling, Case Management and DWI Education. These service activities work in conjunction with DWI alcohol and substance abuse inmates incarcerated within the Detention Center and staff Counselors and Educators. Those placed in this program are referred to the program by the judicial system. A twelve step program approach is used.

Changes and Key Initiatives

Due to the move to the new Metropolitan Detention Center, the program will take on some new changes. Some of the new changes will include 2 pods of 64 male inmates for a total of 128 beds for inmate treatment and 64 beds for female inmate incarceration treatment. The program has also taken on a new identity in the form of the name being changed to the MDC DWI Addictions Treatment Program. The program modality will implement a Therapeutic Community with the use of Moral Reconciliation Therapy for all inmates. The program is a 30-day Level III (American Society of Addictions Medicine Criteria) incarceration Therapeutic Community. The goal is to reduce the number of DWI re-arrests through treating these convicted DWI offenders to make the metropolitan area a safer place to drive and live. A DWI transition program provides a continuum of services to the DWI clients.

Input Measure (\$000's)

2003	260	260 CORRECTIONS AND DETENTION FUND	1,053
2004	265	265 OPERATING GRANTS FUND	2,375
2005	265	265 OPERATING GRANTS FUND	2,368
2006	265	265 OPERATING GRANTS FUND	1,219

Service Activity: DWI Addiction Treatment Program

2123000

Service Activity Purpose and Description

The Detoxification Treatment Program provides social alcohol detoxification and treatment services to inmates, accomplishing safe withdrawal from alcohol abuse or dependency, for up to 28 days. The Detoxification Treatment Program provides the inmates a intense theraputic approach to sobriety through Substance Abuse Counseling, Case Management and DWI Education. These service activities work in conjunction with DWI alcohol and substance abuse inmates incarcerated within the Detention Center and the staff counselors and educators. Those placed in this program are referred to the program by the judicial system. A twelve step program approach is used.

Service Activity number does not exist as of FY/04. It is being used to contain the measures for this program.
